2. User Interface	Page 4
3. Calendar	Page 6
4. Alarm Clock Functions	Page 7

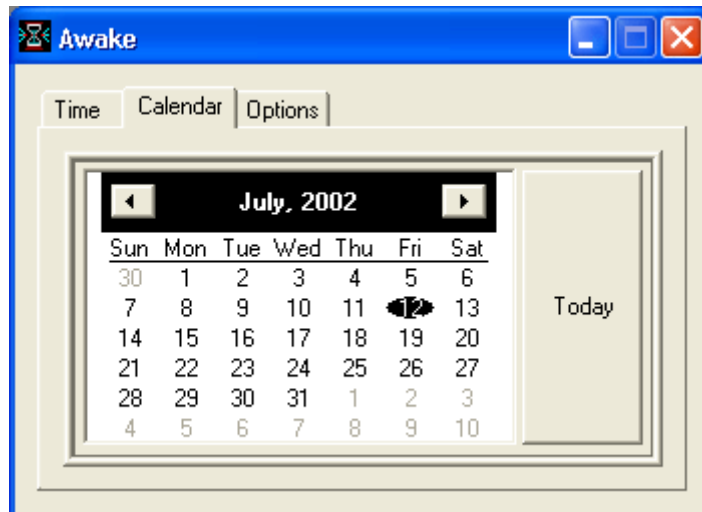

About Awake:

User Interface:

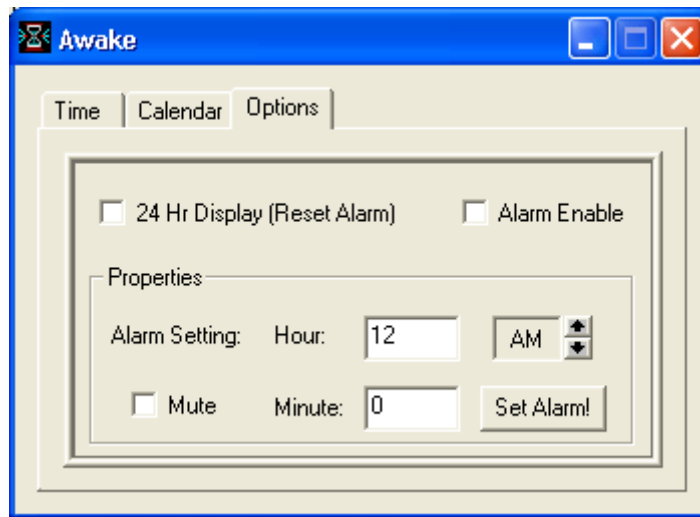

The **Time** tab contains a digital clock displaying the current time.

The **Calendar** tab contains a monthly calendar.

User Interface (continues):

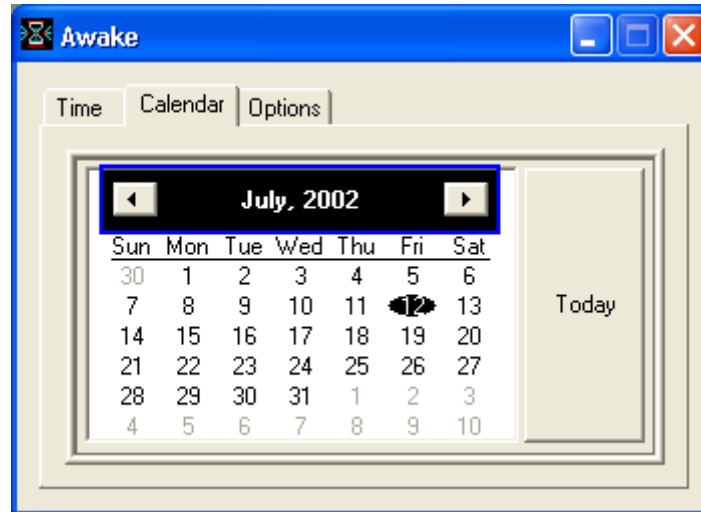

The **Options** tab contains clock and alarm settings

Notes:

- Time may be displayed in 12hr format or 24hr format
 - The 12hr format, or the AM/PM format, is the most widely used time format in the world.
 - The 24hr format is widely used among the scientific and technical personnel as well as the militaries because of its clarity.
- Calendar support browsing capabilities
- Quiet alarm is available (no audio)

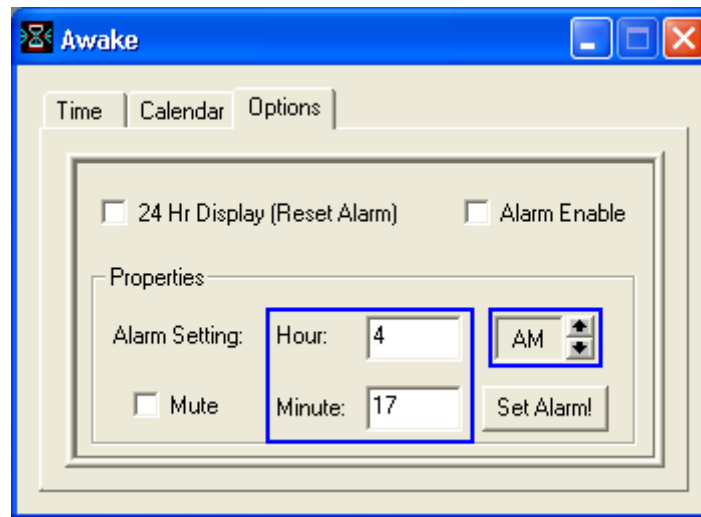

Calendar:

Browsing:

- Jump to any day, month, or year with the browsing box.
- Click on the “**Today**” button will bring you back to the current day.

Alarm Clock:

Settings:

- For better compatibility between the system time and the alarm time, switching between 24hr and 12hr time format will reset the alarm time.
- Set the hour and minute for when the alarm should go off. (**Don't forget to click on the "Set Alarm!" button!**)
- To enable the alarm clock function, the "**Alarm Enable**" box must be checked.
- If the "**Mute**" box is checked the audio alarm will be disabled.

Alert Dialog:

The Alert Dialog will pop up if the system time matches the alarm time. There will also be an audio alarm unless the mute option is selected.
